

<b>ZTE PRAM Board Datasheet</b>	
EMI/lightning-proof/surge protection	Implements the power input EMI (Electromagnetic Interference) filter, lightning-proof, and surge protection.
Over-voltage/under-voltage protection	Implements the power input over-voltage/under-voltage protection.
PFC module	Implements PFC (Power Factor Correction) function.
54 V module	Implements the conversion from AC voltage to 54 V DC voltage.
Over-temperature protection	Implements over-temperature protection, protecting the card from high temperature.
3.4 V module	Implements 3.4 V DC power output.
Current-limiting module	Implements the charge management and power-off management.
Power consumption	PRAM: 13.2 W
Dimensions	PRAM: 200.25 mm × 37 mm × 225 mm (Height × Width × Depth)
Weight	PRAM: 1.346 kg
