

<b>ZTE HFTL Board Datasheet</b>	
Management and control module	Configures, controls, and manages the card.
PON MAC module	Implements all the functions on the XGS-PON layer defined by ITU-T G.9807.
NP module	Implements data processing on the service layer, including service bandwidth and QoS processing based on service types and user needs to meet the SLA requirements. The data processing function complies with TR156.
Optical module	Provides an XGS-PON optical interface that complies with ITU-T G.9807.
Clock module	Processes the system clock in compliance with ITU-T G.8262, G.8264, and G.781.
Dimensions	393.1 mm × 23.9 mm × 214 mm (height × width × depth)
Weight	Enhanced HFTH: 1.65 kg HFTL: 1.65 kg
